PzKpfw I
Commander's Model
(Kleiner Panzerbefehlswagen — SdKfz 265)

SIDE VIEW

This version is based on Model B.

THREE QUARTER FRONT VIEW

Note: The tracks are deficient

PzKpfw II

(Sd Kfz 121)

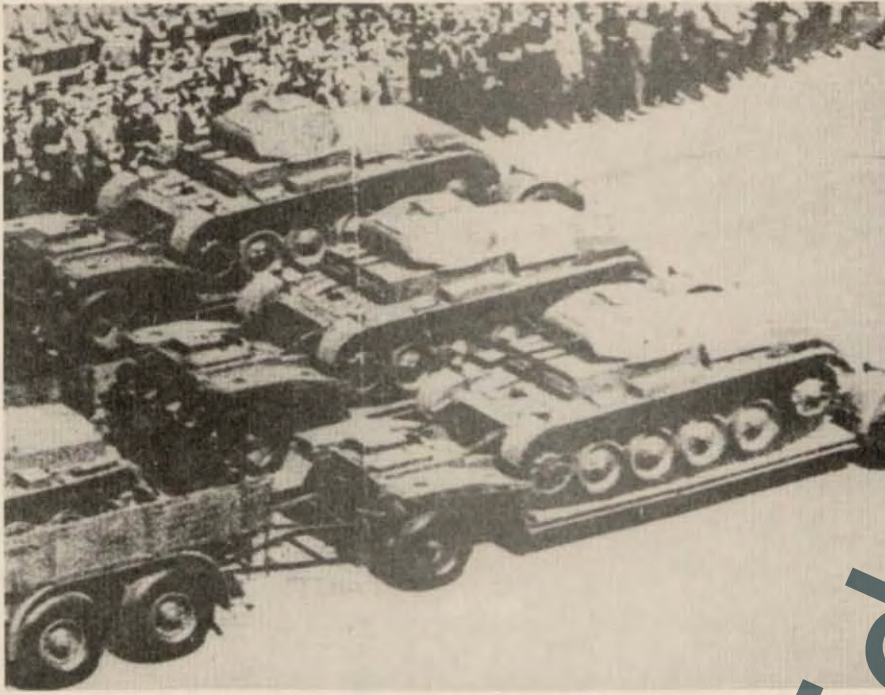

Note the characteristic rounded appearance of the nose of the tank in Models A and B when no additional plates have been fitted.

View of nose of tank where additional plates have been fitted and give it an angular appearance.

PzKpfw II
(Sd Kfz 121)

MODELS D AND E

The tanks are equipped with four large "Christie type" bogey wheels on torsion bars. In 1940 these were converted to flamethrowers.

MODEL F.

This is the latest model to have been met in action apart from the "Lynx".

PzKpfw II-Model L ("LYNX")

ARMoured RECCE VEHICLE
(Sd Kfz 123)

Head-on view - Armament consists of one 2 cm Kw K 38 and a MG 34 co-axially mounted in the turret.

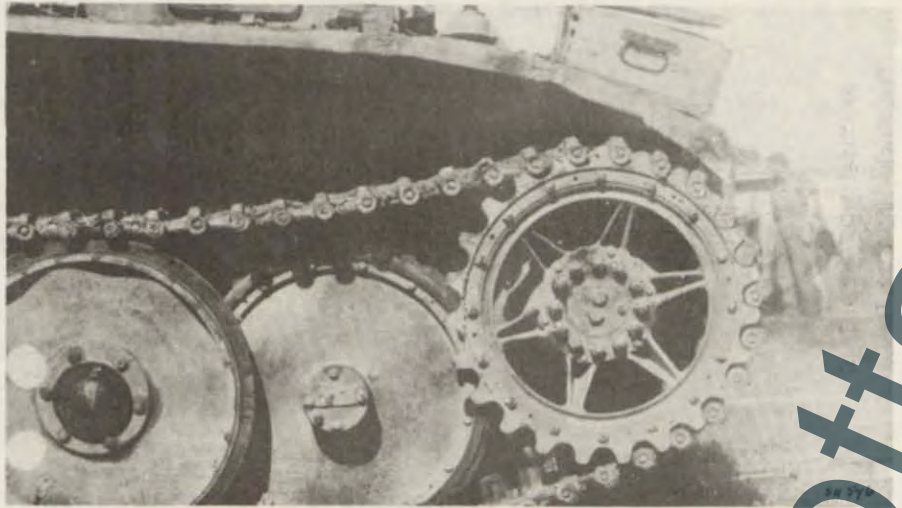

Three quarter front view, showing the interleaved bogey wheels. Torsion bar suspension is employed.

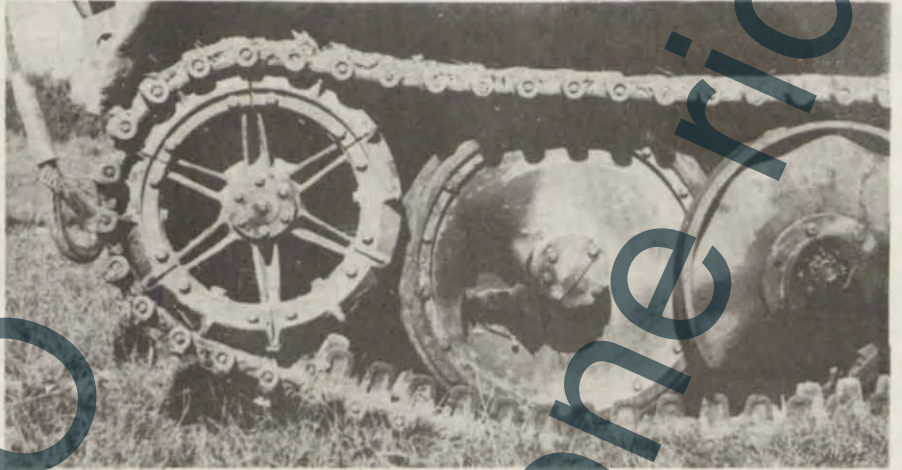

Pz Kpfw II - MODEL L ("LYNX")

ARMoured RECCE VEHICLE

(Sd Kfz 123)

Close-up view of front driving sprocket.

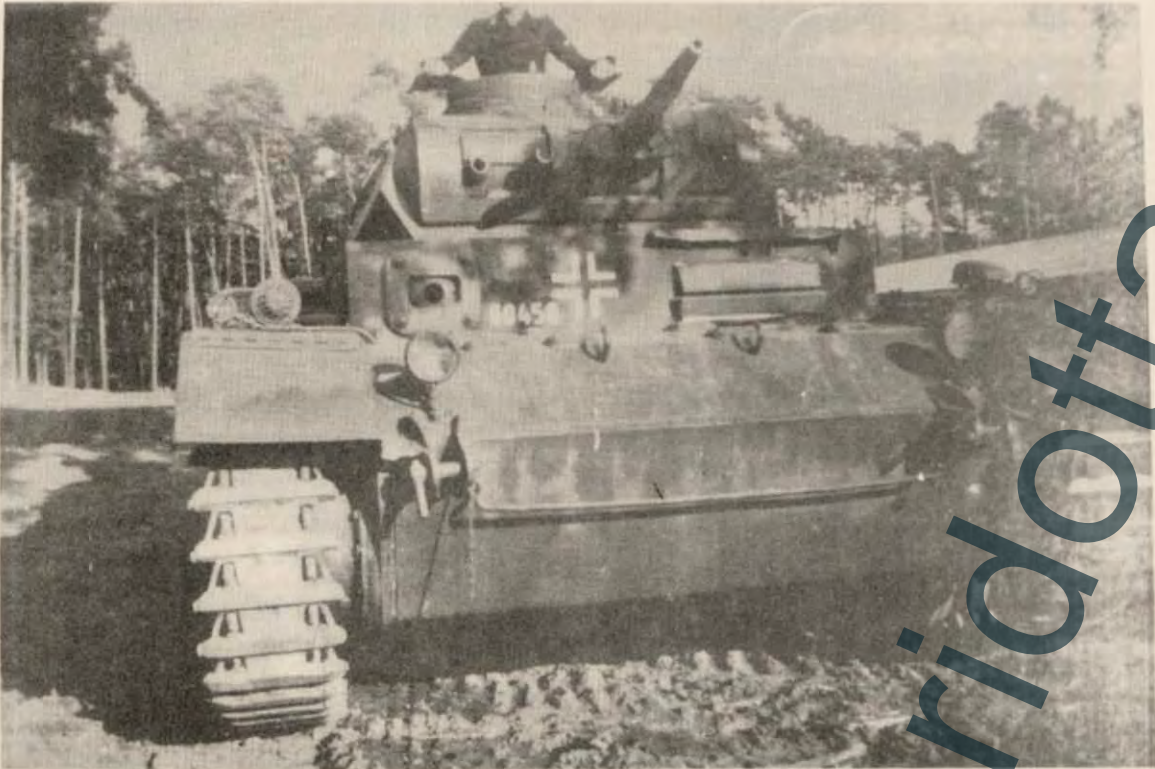

Close-up view of rear idler.

View of turret top and rear showing access hatches.

PzKpfw III

(Sd Kfz 141)

MODEL E: The ball mounting for the hull MG is set behind a square frame and the driver's visor was altered to the double shutter type. The old type of turret with internal mantlet is fitted. The suspension consists of 6 bogey wheels independently sprung on torsion bars.

MODELS F AND G: Similar to Model E, but armed with short 5 cm gun and only one MG in turret. External gun mantlet was provided.

PzKpfw "Tiger" - Model B (SdKfz 182)

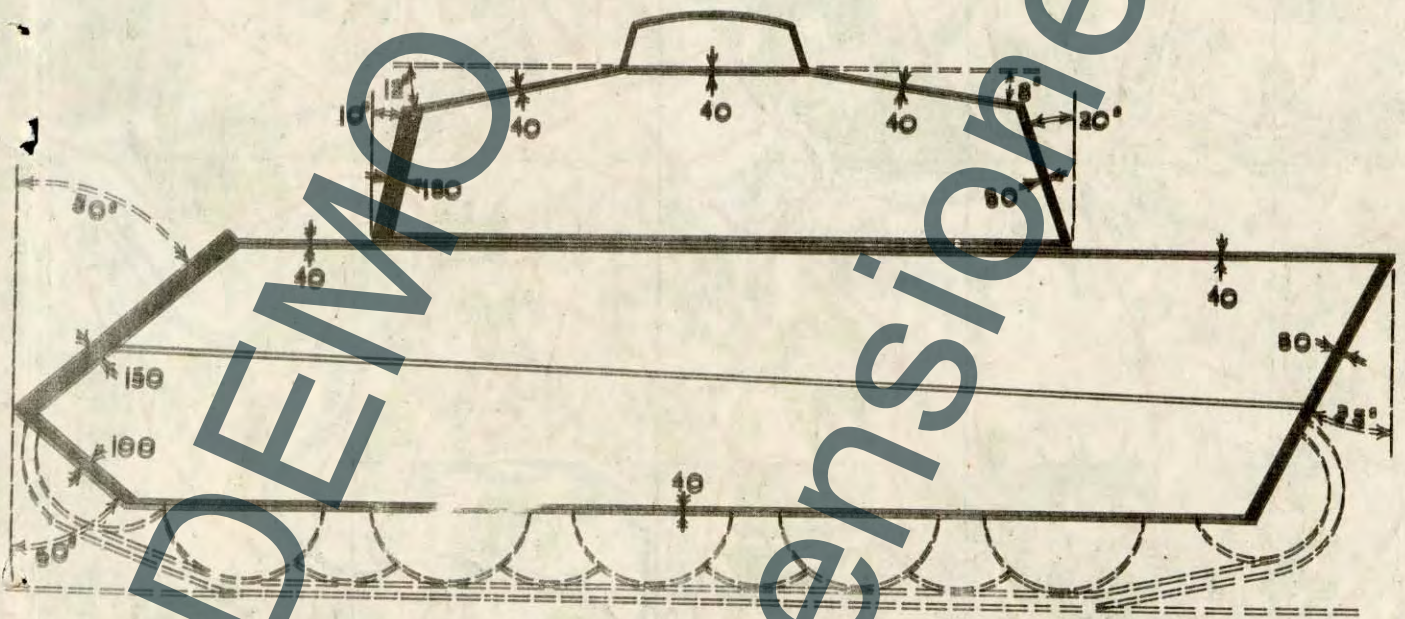

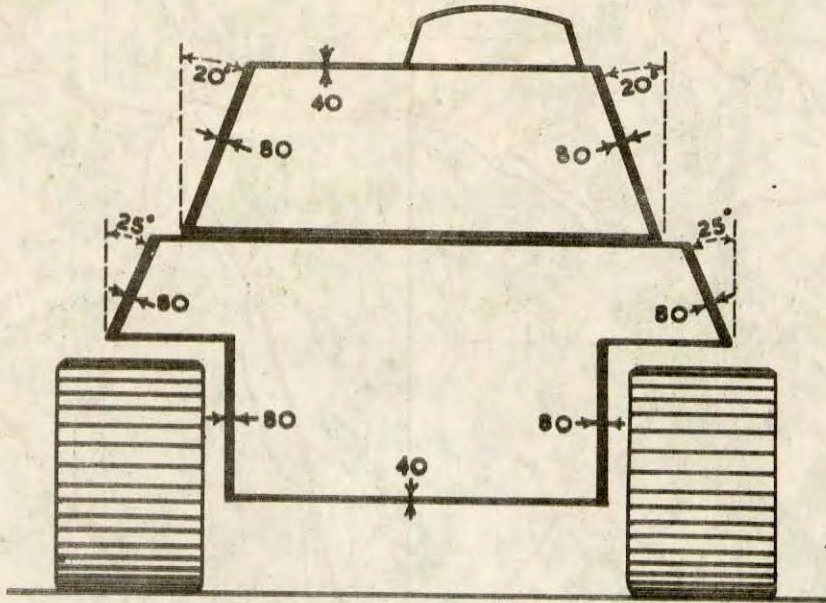

Close up view of suspension (left hand side).

Overturned "Tiger Two" showing suspension; note overlapping double bogey wheels, not interleaved.
